

Letter of Intent to Export Organic Product to Japan

This letter serves to inform the Missouri Department of Agriculture (MDA) Organic Program that the raw or processed organic product that I am (producing and /or handling) is intended for export to Japan. *Circle one or both applicable organic categories.*

I pledge that I have not used the following three additional Japanese-prohibited substances in my organic production or handling processes:

- 1). **Alkali Extracted Humic Acid**
- 2). **Lignin Sulfonate**
- 3). **Potassium Bicarbonate.**

I have included procedures in my Organic System Plan to prevent any contamination of my final product with the above three substances. If I operate a split operation, with some products produced with the use of the three substances, and some product produced without use of the three substances, I will provide plans to prevent any co-mingling of final organic product(s). An audit tracking system is in place to assure that no co-mingling of products will occur throughout final shipping of the product(s).

I have maintained all labels of materials inputs or ingredients that I have used on or in my final organic product(s) to verify compliance to the Japanese export requirements. I will have the labels available for review by the Missouri Organic Program inspector, or other authorized personnel, upon request.
